Basic Grass Pack
24 Grass Models

Long Grass

Lush Grass
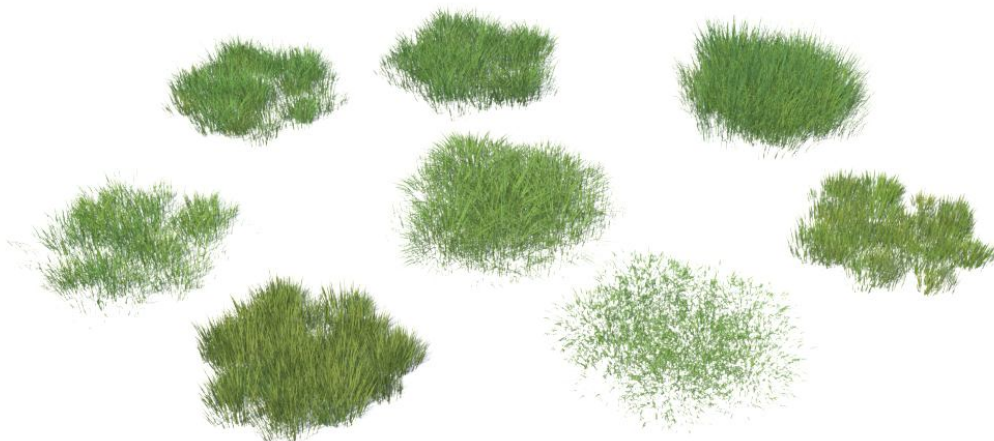

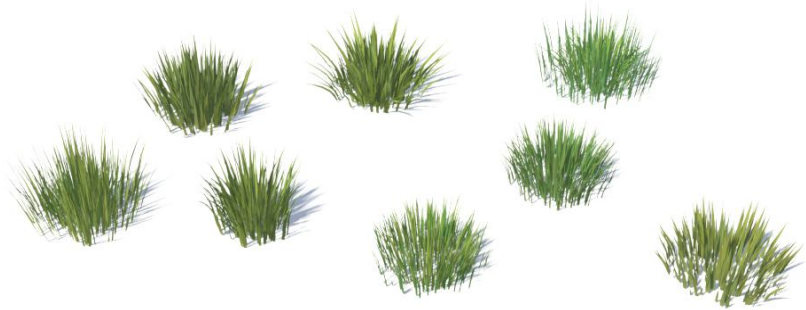

Large Grass Patches

Please respect the request to provide a link to where you obtained this object pack as a service to others. There is nothing more frustrating than seeing a credit for a free object with no clue as to where a copy may be obtained.

Description:

24 grass models that should cover most basic situations where grass is needed. Loads of variety; long grass (around 80 cm), shorter lush grass clumps and a variety of larger grassy patches. Each model contains some built in variation in both colour and blade length; this is good for a single population but why not Mix'N'Match?

The models are fairly detailed but polygon counts have been kept as low as reasonable so are not guaranteed not to show polygonal boundaries in extreme close up.

What's in the pack:

Long Grass:
